*Who we are*

*In love with paper*

We are paper disposables manufacturer for the HORECA industry and we are specialized in the personalization of paper napkins, paper cutlery pochettes with napkin and paper chopstick pochettes.

We follow up the manufacturing process from the mother roll to the final pallet; we supervise all the stages of production step by step.

We can guarantee productive flexibility, time-to-market and an effective pre and post sales support.

Our mission is becoming the right partner for every foodservice professional that want to add an original and personal touch to their location.

# Why choosing us

## Quality of the raw materials

In order to provide a superior quality and exclusivity and to ensure pureness, softness and strength of our products, we use only pure cellulose wadding paper, supplied by the most renewed Italian and European papermills. A superior pure cellulose wadding quality is the first step to guarantee printing quality both in terms of colour tone and graphic precision.

## High productive flexibility

Thanks to our productive flexibility, we are able to satisfy specific requests for customized packaging solutions and minimum order quantities. The main issue is to listen constantly to our customer needs, in order to satisfy also out-of-standards packaging requirements.

## Logistic and delivery

We rely on collaborations with the most trusted freight and logistic companies to ensure high coverage of the national and international market as well as a safe and timely delivery. With our distributive and commercial network, we guarantee an efficient and fast service to satisfy time-to-market and post-sale support. We always check with our customer the best delivery solutions.

## Our Know How

Life long experience in paper disposables manufacturing and personalization has led us to offer know-how and high quality standards. The experience gained over the years, allow us to guarantee nowadays high quality personalized paper disposables at the best price.

# Certifications

We had always been strongly focused on environmental respect and high quality of the raw materials. Nowadays, Converting & Trade, is proud to join an international non profit initiative like FSC (Forest Stewardship Council). Our membership with this project led us to use certified raw material, coming from responsibly managed forests. When you see the logo FSC , you can be confident that wood or paper products are made of material derived from forests, in which high ecological - social - and economic standards are respected.

"A responsible forest management means: preserving the natural environment, leading real benefits to population, local community and workers and ensuring economic efficiency."

Request our products FSC certified.

## Product Range: Paper Napkins

Our wide range of formats, veils and colours will enable you to satisfy the most demanding customers. Choosing our products selection means providing a combination of softness, resistance, originality and quality to your guests.

In order to meet the most creative minds, we also produce personalized napkins always using water-based-inks strictly selectioned to respect the applicable legislation.

Our core business has always been to project and produce personalized disposable products not only in their graphic but also in their packaging.

The printing is always made with the use of water-based inks respecting the UE food safety legislation and environmental sustainability.

# Product range: Paper Cutlery Pochettes

Paper Cutlery pochettes are a smart, fast and professional disposable solution to dress your table in the best way, saving time and speeding up the service; they are perfect and functional not only for pizzerias and restaurants but for all the away-from-home (AFH) occasions.

They are available in white kraft paper, semi straw yellow paper, in transparent polypropylene or PLA and in cardboard with inside a white or coloured, neutral or personalized paper napkin available in our vast range.

We can supply also an eco-friendly and compostable version matching kraft paper with BioPBS.

consultare pagina 52

## Packaging

PLA (polylactic acid) is a cutting-edge bioplastic, derived from the transformation of sugars present in corn, beetroot, sugarcane and others natural and renewable materials. Unlike the traditional plastic, PLA does not come from oil, in fact this material is biodegradable and compostable, therefore when it reaches perfect humidity and temperature, it degrades quickly in soil.
